## ***RIGHTS OF THE EARTH. RIGHTS TO THE EARTH: EVENTS AND INITIATIVES AT BIODIVERSITY PARK***

*Rome, 23 April 2015* – Designed and created by BolognaFiere, Biodiversity Park and the Organic Pavilion are the themed areas of EXPO dedicated to organic agriculture and agricultural biodiversity, where young and old, families and groups can experience Italy's environmental heritage, landscapes and the agriculture of the future.

At the heart of EXPO, from Palazzo Italia to the Eastern Entrance, it will be possible to take part in a rich programme of initiatives dedicated to environmental sustainability, the safeguarding of Italian landscapes and natural heritage, meetings organized by the Ministry of the Environment and the associations and companies involved in Biodiversity Park. After having taken a walk through the Italian landscapes in the green area of Biodiversity Park and having attended lessons on Biodiversity, visitors will be able to take part, at the Centre of the Earth Theatre, in the events and conferences organized for *International Biodiversity Day*, *World Environment Day*, the *European Week for Sustainable Mobility* as well as fascinating debates on the themes of climate change and food security.

Biodiversity Park also offers a rich programme of initiatives dedicated to organic, sustainable and innovative agriculture: the agriculture of the future. At the heart of the park there will be events involving key figures from the organic movement and individuals involved in the campaign "*Rights of the Earth. Rights to the Earth*", while the schedule also represents the starting point for the Organic Forum, the round table discussion with the organic associations that aims to underline the importance of sustainable agriculture for feeding the planet in the future.
